

# CLOUD CONNECT

NEXT GENERATION CONNECTIVITY

---

When using Cloud Services, contents and resources are no longer so close to end users.

So, it is essential to provide good quality in the connectivity in order to ensure top user experience.

With our service you can connect the public clouds directly to your private network, improving performance and security. Using Cloud Connect instead of Internet prevents network congestion, and avoids packet drops, suboptimal routing and latency variations in order to achieve the best results in terms of throughput. End to end latency and availability are also warranted by SLA.

# NEXT GENERATION CONNECTIVITY

Our Cloud Connect service is available for AWS, Azure, Google, Salesforce, Oracle, IBM Cloud and Alibaba Cloud enabling users to enjoy the best Multi-Cloud experience!

+ MORE

## FEATURES

### SCALABLE BANDWIDTH

You get scalable bandwidth options, starting at 50 Mbps and extending to 10 Gbps, in order to make your cost structure more efficient.

### ADVANCED SECURITY

We provide a unique service delivering an end-to-end secure solution encrypted from customer premise to the cloud infrastructure to maximize the protection and confidentiality of your critical data.

### SERVICE OFFERING

Next-generation connectivity to the Cloud with our highly-ranked SDN Network and resilient Enterprise WAN connectivity service.

We are a technology partner of AWS, Azure, Google, Salesforce, Oracle, IBM Cloud and Alibaba Cloud: allowing its customers and partners to connect to the content of this ecosystem optimally and economically.

### 24x7x365 DEDICATED EXPERT SUPPORT & LOCAL ATTENTION

Unsurpassed service availability and performance with access to a 24x7x365 Expert Technical Support.

Mix and match your cloud applications by connecting to any or multiple of the world's leading providers and accessing best-of-breed services. Connect to multiple cloud regions from a single connection with greater security and privacy than traditional networking solutions.

## FLEXIBLE & ELASTIC MULTI-CLOUD SOLUTIONS
