

# DIA

DEDICATED INTERNET ACCESS

---

Dedicated Internet Access connects your enterprise with a carrier-class, next-generation network throughout the Americas.

We deliver super-fast, super-reliable Internet connectivity between the US and Mexico, throughout Latin America, and globally via strong relationships with Tier 1 providers.

# PERFORMANCE WITHOUT BOUNDARIES

Speed, security and reliability are guaranteed with the flexibility to use your own network equipment or our hardware and software. A choice of security options and service level agreements are designed to fit your budget. Our network is highly interconnected with the major Content Delivery Networks and Local NAPs (Network Access Points) in the region to provide optimal regional routing across the Americas.

## QUICK FACTS & FEATURES

- **Non-Shared, Direct Fiber Connections**  
Fiber connections to our carrier-grade network.
- **Pan-Regional Network**  
Points of Presence (POPs) that gives international carriers a bridge into local networks.
- **Fully Resilient Platform**  
The ability to run services on top of any international and terrestrial cable system managed by our SDN platform. This allows us to provide fully resilient and customized solutions that fit your specific business needs.
- **10 MBPS - 100 GBPS**  
Scalable bandwidth options starting at 10 Mbps and extending to 100 Gbps and beyond.
- **Next-Generation Firewall (NGFW) or Unified Threat Management (UTM) options.**  
Plus, routing protocols and use of IPSEC/GRE tunnels keep your data secure.
- **Delivery Options**  
Choice of delivery options to either existing customer equipment or our hardware and software (Software-Defined Network appliance, router or firewall).
- **Personal Expert Support**  
Dedicated specialists and careful "around the clock" proactive monitoring and fault management.

CENTRALIZED MONITORING  
**24/7/365 MANAGEMENT**  
PERFORMANCE & SECURITY BREACHES

ANYWHERE NETWORK WITH  
**DIRECT CONNECTIONS**  
SaaS SERVICES, CONTENT & CLOUD PROVIDERS

DUAL STACK  
**IPv4 OR IPv6**  
ENABLED

CONNECT EVERYWHERE  
**EXTENSIVE COVERAGE**  
THROUGH THE AMERICAS & BEYOND

SERVICE LEVEL AGREEMENTS  
**GUARANTEED AGAINST**  
JITTER, ROUND TRIP DELAY, PACKET LOSS

SECURE TRAFFIC  
**CLEAN PIPE**  
PROTECTION AGAINST DDOS  
ATTACKS & ANOMALOUS TRAFFIC

Transtelco offers innovative, customer-driven communication solutions for telecom carriers and blue-chip enterprise customers throughout the Americas. With the acquisition of Neutrona, an innovative SDN provider, Transtelco continues to extend its network coverage and provide its customers with superior customer experience, reliability, network intelligence and process automation.

Overlaid with an award-winning, proprietary Software Defined Network (SDN) backbone, Transtelco's state-of-the-art fiber network spans from the Southwestern United States to the East Coast, into Mexico and throughout all of LATAM by leveraging its use of multiple sub-sea cable systems and terrestrial fiber rings, linking international markets to operate contiguously.
